SAP BusinessObjects XI Migration

Don't Get Left Behind

Now is the time to migrate

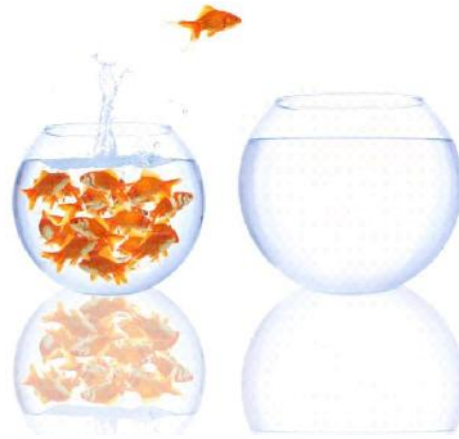

Firmly established as a key ingredient in the Business Objects product set XI is not just an upgrade. Migration to XI is an opportunity to enhance your organisation's entire Business Intelligence (BI) solution.

Still supported?

Did you know that BusinessObjects 5.x, 6.x and Crystal Enterprise 10 is no longer supported? If you are still running on one of these versions can you afford not to be supported?

How can we help?

IT Performs is one of only a handful of accredited BusinessObjects XI Migration Specialists in the UK. Our certified BI consultants are experts in their field & have years of experience in delivering successful BI solutions to all sizes of organisation. IT Performs will be with you through the entire migration project lifecycle.

Services

Migration Readiness Assessment

This vital low-cost first step provides you with analysis of your current implementation & recommends a strategy for migration.

Planning & Design

IT Performs plan & design every aspect of your migration project, from content analysis to an assessment of your infrastructure requirements.

Implementation

We will help you implement a migration solution with minimum effort, disruption & cost.

After Care

We will provide extensive documentation relating to your migration & a full range of training is available to assist your users with their adoption of XI.

Why IT Performs?

Proven Capability

IT Performs has a track record of delivering successful BI solutions to organisations of all sizes.

Business Intelligence Specialists

IT PERFORMS

SAP BusinessObjects XI Migration

Over 12 Years Experience

We have been a Business Objects consulting partner for more than 12 years and bring a wealth of experience to assist in all aspects of the transition.

Tailored Solutions

No two environments are the same! We provide solutions tailored to your specific business needs ensuring you get the maximum benefit from moving to XI.

Recognised

As a Business Objects Gold partner you can be assured we'll provide you with the best solution & ensure your migration to XI is successful.

Summary of XI Benefits

Web Architecture: XI content is accessed via a web browser, negating the need for client software.

Standard Platform: Track, manage & understand your organisation's information on a single BI platform.

Performance, Reliability & Scalability: A distributed architecture means flexibility & offers improved performance, reliability & scalability.

Administration over the Web: Ease of administration is facilitated by web-based tools.

Live Office: Integration with Microsoft Office ensures trusted data for all users.

Integrated Dashboards: XI offers dashboard capability for a simplified view of business KPIs.

About IT Performs

At IT Performs our core business areas are Business Intelligence, Data Migration & Data Warehousing and have been for many years. We specialise in the market leading software from Business Objects and know the complete toolset from Data Integrator (ETL), Reporting (WebI/Crystal/Xcelsius) through to Performance Management (EPM/Dashboards) and Planning, Budgeting & Consolidations (PBC).

We use a pragmatic and real world approach to deploy cost effective solutions, ensuring project success. We work with all the major databases and ERP systems to turn your data into trusted information. If you require help with Strategy, Migration or Development, IT Performs will be your friendly, customer focused partner. Our customers include; Muller Dairy, Birmingham Midshires, Speedy Hire, Coors Brewery, Sage, Endemol, Cadburys, Birmingham City Council, Medical Research Council, HBOS, Barclaycard, Landmark, Fitness First, Experian, Arval, Notts Healthcare, NFU Mutual & many more.

SAP BusinessObjects XI Migration

What's New with Business Objects XI 3.1?

The full spectrum of BI capabilities provided by BusinessObjects XI 3.0 – from reporting, query and analysis, dashboards and visualisation to predictive analysis – helps ensure all people get the right interface and level of interactivity for their role. Business Objects has developed the next-generation user experience, including search and exploration, mobile BI and desktop-based metrics, to dramatically extend the power & freedom of BI to a far wider community. BusinessObjects XI 3.1 includes significant updates to the portfolio, such as:

- **Crystal Reports 2008**, the industry de facto reporting standard, the only reporting solution to embed Flash and Flex for more interactivity and integrating BI with business processes
- **Web Intelligence**, the most advanced query, reporting and analysis tool, now for the first time providing users with both online and offline access
- **Xcelsius 2008**, a point-and-click data visualisation tool designed to create interactive, shareable dashboards – now with easier and more powerful analytic creation
- **Polestar**, the next generation of data analysis that combines the simplicity and speed of search with the trust and analytical power of BI to provide immediate answers to business questions
- **BI Widgets**, a new capability that puts personalised metrics directly on people's desktop, so they can monitor key performance indicators and access the most up-to-date information directly from their desktop
- **Voyager**, an OLAP data exploration tool designed specifically for financial and business analysts – now with enhanced multi-dimensional analysis and visualisation
- **Mobile**, a solution for remote access to favorite BI reports, metrics and real-time data with a single click of a wireless device – including enhanced alerts and disconnected analysis mode
- **Live Office**, which allows secure & simple embedding and updating of new data in Microsoft Office Word documents, Excel spreadsheets and PowerPoint presentations, with even greater platform support
- **Dashboard Builder**, which provides instant insight into business activities by viewing all BI content together in one consolidated dashboard view, now with enhanced interfaces and usability workflows
- **Enhanced support for SAP users** including improved performance, increased support for SAP metadata and broader integration for SAP applications

One Platform for Complete, Trustworthy, Agile BI With BusinessObjects XI 3.1, IT can cost-effectively serve the demands of the business, delivering all the right information to everyone who needs it. A single intelligence platform delivers common services such as information management, metadata management, security and auditing. New with BusinessObjects XI 3.1, BusinessObjects Data Services combines two market-leading technologies, Data Integrator and Data Quality, in one enterprise-class solution – an industry first!

If you require further information on the new features and functions of XI 3.1 or have any queries around your systems please do not hesitate to contact our offices on **0845 124 9495** alternatively contact us via email: contactus@it-performs.com
